

## INTRODUCTION

The Women in Engineering (WIE) network is a global organisation dedicated to promoting women and their achievements in engineering and science. It functions as a crucial support system and advocacy platform, providing mentorship, professional development opportunities, and a collaborative community to help women succeed and lead in these traditionally male-dominated fields.

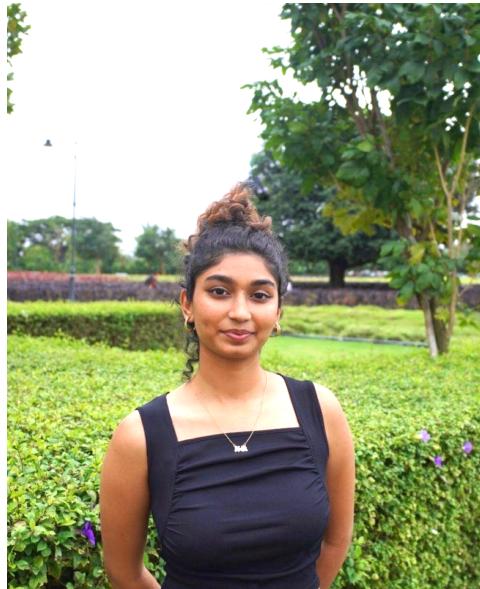

The Women in Engineering (WIE) network operates as a dynamic global nexus, uniting a diverse cohort of professionals, researchers, and students to champion a paradigm shift in the traditionally androcentric fields of engineering and science.

Far more than a mere professional society, WIE functions as an intellectual and collaborative catalyst, fostering an ecosystem where the academic and professional trajectories of women are not just supported but actively accelerated.

By facilitating robust mentorship programs, stimulating critical discourse on equity, and creating high-visibility platforms for research and innovation, the network dismantles systemic barriers and cultivates an environment ripe for success. It is within this synergistic community that aspiring and established engineers alike find the resources, advocacy, and solidarity necessary to thrive, ultimately enriching the global scientific landscape with diverse perspectives and transformative contributions.

## COMMITTEE of WiE

### **CHAIR**

*Sree Namrutha*

### **VICE - CHAIR**

*Harshitaa*

**GENERAL SECRETARY**

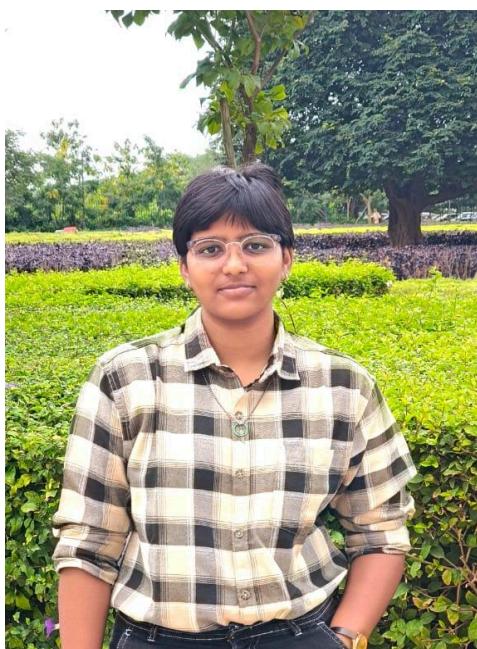

*Risha Shenoy*

**PR HEAD**

*Anushka Sinha*

**SOCIAL MEDIA**

*Madhu Vaishnavi*

**MARKETING**

*Riddhi Rajesh*

## OPERATIONS & LOGISTICS

*Shifa Sameer*
